Of all the amusements which can possibly be imagined for a

hard-working man, after his day's toil, there is nothing like

reading an entertaining book. It calls for no bodily exertion of

which he has had enough. It relieves his home of its dullness.

It transports him to lovelier and more interesting scenes; and

while he enjoys these, he may forget the evils of the present

moment. Nay, it accompanies him to his day's work, and if

the book he has been reading be anything above the very

idlest and lightest, it gives him something to think about

during the drudgery of his everyday occupation. If I were to

pray for a taste which should stand me in good stead under

every variety of circumstances and be a source of happiness

and cheerfulness through life, it would be a taste for reading.

Give a man this taste and the means of gratifying it, and you

will never fail to make him happy, unless indeed you put into

his hands the most perverse selection of books. You place him

with the best society in every period of history, with the

wisest, the wittiest, the tenderest, the bravest, and the purest characters which have adorned humanity. You make him a citizen of all nations, a contemporary of all ages.

this complicated hydrography is largely responsible for shaping the destiny of the land and its people. While flowing downwards from the melting snow of the Himalayan glaciers, these streams deposit enormous volumes of fertilising silt before spilling into the Bay of Bengal. The rich alluvium of the rivers enriches the land and sustains a teeming population. The same rivers often change their courses and engulf many human settlements located on their banks and cause untold miseries to the people

during devastating floods. The rivers are, therefore, the sources of both joy and sufferings to the people of Bangladesh.
