## Digital Banking in the context of Bd

Digital banking is the broader concept of online banking. It is mainly the banking system over internet. For the vast use of API in mobile or using ATM, digital banking is becoming very handy now-a-days.

In the context of Bangladesh, using banking facilities is <sup>getting</sup> more popular because of introducing of digital banking. Most of the banks, now, have their own API and ATM booth. And as the system is now ~~more~~ easier, people are intended to deal in with bank.

• The life is now easier with the help of digital banking because with this facilities, you can do almost every choices

in your day to day life . life.  
like - bill payment, money transaction,  
Just with your mobile app .

In Bangladesh, there are many popular  
mobile banking system like - Nagad,  
Rocket, bkash

encompassed all aspects of the economy  
the banking sector is no exception. Although  
digital banking is ~~used~~ broad and better in  
much of the developed world, it is relatively  
new in the context of our country. It has  
huge potential to capitalize on — including  
ease of transaction, faster processing and  
widening of market. With potential comes challenge.  
Security issue is a growing concern with  
regards to digital banking and digital adoption.

azomac

state has also not quite ~~calmed~~ caught up.

Blockchain is the latest addition to FinTech which can revamp the digital banking scene. It'll solve the security issues associated with digital banking. Already HSBC has started clearing Letter of Credits (LC) with the use of blockchain technology.
